Letter of Support for the Alameda Lanes Repurposing Project

August 25, 2025

Mayor Mike Johnston
Amy Ford
Denver Department of Transportation and Infrastructure (DOTI)
201 W. Colfax Ave.
Denver, CO 80202

CC: Greg Cieciek (Council District 7)
Molly Lanphier (Council District 6)
gregory.cieciek@denvergov.org
molly.lanphier@denvergov.org

Dear Mayor Johnston, Ms. Ford, and DOTI Representatives:

Preface: This letter represents an organic grassroots effort organized by David Hawkins, a local father concerned about traffic safety in our neighborhood. The signatures were collected through our community website safer-alameda.com, where neighbors could learn about the project and add their support. We have gathered 182 signatures from community members who support this important safety initiative.

We, the undersigned residents, business owners, and community members, write to express our strong support for the Alameda Lanes Repurposing Project. This initiative represents thoughtful, evidence-based transportation planning that will improve safety, enhance livability, and benefit our community for years to come.

Why We Support This Project

Enhanced Safety for All Users: The project's safety improvements including protected crossings, pedestrian islands, and reduced crossing distances will significantly improve safety for pedestrians, cyclists, and drivers alike. These evidence-based design elements have proven successful in cities across the nation.

Improved Traffic Flow: Dedicated turn lanes will prevent turning vehicles from blocking through traffic, actually improving traffic flow and reducing congestion. This is a win-win solution that addresses mobility while prioritizing safety.

Neighborhood Protection: Strategic bollards and turn restrictions will prevent dangerous cut-through traffic in residential areas, making our neighborhoods safer for families and children. This protects the residential character of our community.

Economic Benefits: Research consistently shows that walkable streets with appropriate traffic calming measures increase local business revenue. Slower, safer streets encourage people to stop, shop, and engage with local businesses.

Environmental Responsibility: By creating more walkable infrastructure and encouraging sustainable transportation options, this project aligns with Denver's climate goals and contributes to improved air quality for our community.

Addressing Concerns with Facts

We understand that some community members have expressed concerns about this project. However, extensive research and real-world examples demonstrate that well-designed road reconfigurations like this one:

- Typically have minimal impact on travel times while dramatically improving safety
- Reduce serious crashes by up to 25% according to Federal Highway Administration studies
- Improve pedestrian safety by up to 40% with protected crossing infrastructure
- Support local economic development through increased walkability
- Maintain emergency vehicle access while improving response times through reduced congestion

Our Request

We urge DOTI to move forward with the Alameda Lanes Repurposing Project as planned. This project represents the kind of forward-thinking, evidence-based transportation planning that Denver needs to create safer, more livable neighborhoods for all residents.

The safety of our community members—pedestrians, cyclists, and drivers—should be our top priority. This project achieves that goal while maintaining mobility and supporting local economic development.

Thank you for your leadership in prioritizing safety and livability in our transportation infrastructure.

Sincerely,

David Hawkins & the following
