Can we add just a small tweak to the data paragraph- it's not that we didn't review, it's that the numbers have been updated, right? See below for my suggestion. It's a very small change, which I am not sure is needed.

Subject: FW: [EXTERNAL] Alameda lane reconfiguration

Brett and Molly,

Can you both please review this response below to Thomas' email before I send it out. Specifically, I want to make sure I am not overstepping with my comments about the data being reviewed.

Any edits are welcomed.

Molly, I am going to cc you on the final response so he knows we will not be in attendance.

Thanks,
Greg

Hi Thomas,

Thank you for reaching out and for organizing a meeting for neighbors to share their perspective views on the Alameda Lane Repurposing Project. We appreciate your continued engagement and advocacy on behalf of the community.

We are aware of both the growing opposition and the support the project has received. As with any proposed changes to a major corridor, it's understandable that there are a range of opinions, and we're committed to considering input from all voices.

We're also currently reviewing our data collection with the latest numbers to ensure we've thoroughly examined traffic volumes, crash history, and potential impacts to nearby intersections and adjacent streets, including those you mentioned like Downing at Cedar, Dakota, and Virginia. Unfortunately, we won't be able to attend the meeting on August 12, but we truly value the dialogue that's happening and want to continue gathering feedback from all sides.

We'll be sure to share additional information as the project continues to develop and will continue to look for opportunities to connect with community and neighborhood groups. Please don't hesitate to share any notes or follow-up questions that come out of your meeting—we'd be happy to review and respond where we can.

Thanks again for your outreach and for keeping us in the loop.

Best regards,

Subject: [EXTERNAL] Alameda lane reconfiguration

Greg,

I'm not sure how aware you are of the growing concern & opposition from neighbors regarding the E Alameda Lane Reconfiguration. There's been a couple articles in the Denver Gazette<https://denvergazette.com/news/wash-park-residents-upset-alameda-avenue-construction-project/article_0840d019-ac7a-4928-bab5-42ac2c574907.html> recently along with a website<<https://www.actforalameda.com/>> about this. A supportive website<<https://safer-alameda.com>> was also just created by other advocates.

I have arranged to meet with some of the neighbors concerned about the project on Tuesday, August 12 at 4pm at Blackbird Public House at Alameda & Downing. I'm also opening it up to leaders & neighbors in WWPNA. It'd be great if you could join us with any documentation that can further explain the project & impact expected to the adjacent streets, as this seems to be a concern DOTI has not addressed yet, at least not in public.

Please review the article & websites for concerns from the neighbors. While the focus has been very narrowly limited to Alameda & adjacent properties, it's important that we look at & address the other issues that are present nearby both currently existing & expected from the project. My reading is that the intersections of Downing at Cedar, Dakota & Virginia are of the greatest concern, beyond the traffic volume changes to the e-w parallel streets.

I'm also inviting council members from districts 6 & 7 to join so they have an opportunity to learn about the neighbors concerns. Please confirm if you or an engineer familiar with the project can join us, not just Nancy Kuhn.

Thank you,

Thomas Topero
